Re: Filter Installation at Belgooly, Co. Cork

Dear Sirs,

I am pleased to confirm that Cork County Council is satisfied that the 900 diameter V.V.F stainless steel filter installed by Aquasol Engineering Ltd. on an experimental basis for manganese removal is working very satisfactorily at Belgooly, Co. Cork. This is particularly welcome to Cork County Council because of the very restrictive footprint that was available for any manganese removal system.

In accordance with the original agreement, Cork County Council now wishes to purchase the VVF filter as per the agreed terms.

In addition to the filter achieving the manganese reductions desired, Cork County Council has observed a marked reduction in the build up of discolouration on the bulbs of the UV filters which has facilitated reduced cleaning of the bulbs.

Cork County Council would now be pleased to consider your filters in any future applications.

Yours faithfully,

Dan O'Sullivan – A/Senior Engineer Drinking Water
for and on behalf of Cork County Council.
